<sup>1</sup>After subtraction for the CDQ reserve and the incidental catch allowance, the pollock TAC is allocated as follows: inshore component - 50 percent, catcher/processor component - 40 percent, and mothership component - 10 percent. Under paragraph 206(a) of the AFA, the CDQ reserve for pollock is 10 percent. NMFS, under regulations at § 679.24(b)(4), prohibits nonpelagic trawl gear to engage in directed fishing for non-CDQ pollock in the BSAI. The A/B season, January 20 - June 10, is allocated 40 percent and the C/D season, June 10 - October 31 is allocated 60 percent.

<sup>2</sup> The SCA limits are established as the amount, in metric tons, authorized for the 2000 pollock fishery (65 FR 3896, January 25, 2000).

<sup>3</sup>The pollock incidental catch allowance for the BS subarea is 4 percent of the TAC after subtraction of the CDQ reserve.

<sup>4</sup>Subsection 210(c) of the AFA requires that not less than 8.5 percent of the directed fishing allowance allocated to listed catcher/processors (C/Ps) shall be available for harvest only by eligible catcher vessels (CVs) delivering to listed catcher/processors.

<sup>5</sup>The AFA requires that vessels described in section 208(e)(21) be prohibited from exceeding a harvest amount of one-half of one percent of the directed fishing allowance allocated to vessels for processing by AFA catcher/processors.

<sup>6</sup>Paragraph 210(e)(1) of the AFA specifies that "No particular individual, corporation, or other entity may harvest, through a fishery cooperative or otherwise, a total of more than 17.5 percent of the pollock available to be harvested in the directed pollock fishery."

<sup>7</sup> Consistent with the RPAs, the Aleutian Islands subarea and the Bogoslof District are closed to directed fishing for pollock. The amounts specified are for incidental catch amounts only, and are not apportioned by season or sector.
